

Boma Soapdispenser

Description

The Boma soapdispenser with refillable reservoir can be filled with Boma Handsoap Mild, or any other liquid soap. The soap is very well protected against dirt and damp by the closable reservoir.

By the well thought-out design it is very practical and easy to maintain. The dispenser has a large window so that it's easy to see when a refill is necessary. The 'arm-lever-free' design (the whole front serves as 'push button') minimises dirt traps and makes the dispenser much more durable.
